Background

Toi Mai Workforce Development Council (Toi Mai) and the New Zealand Film Commission (NZFC) conducted the Screen Workforce Survey as part of a wider Workforce Capability and Development Plan for the screen sector. This Plan seeks better alignment between the Screen Industry (film, TV, and interactive media) and vocational training needs, with outcomes that will include a national, sector-informed workforce capability scan and advice to the Tertiary Education Commission regarding longer term investment in vocational education and training for careers in screen.

Methodology

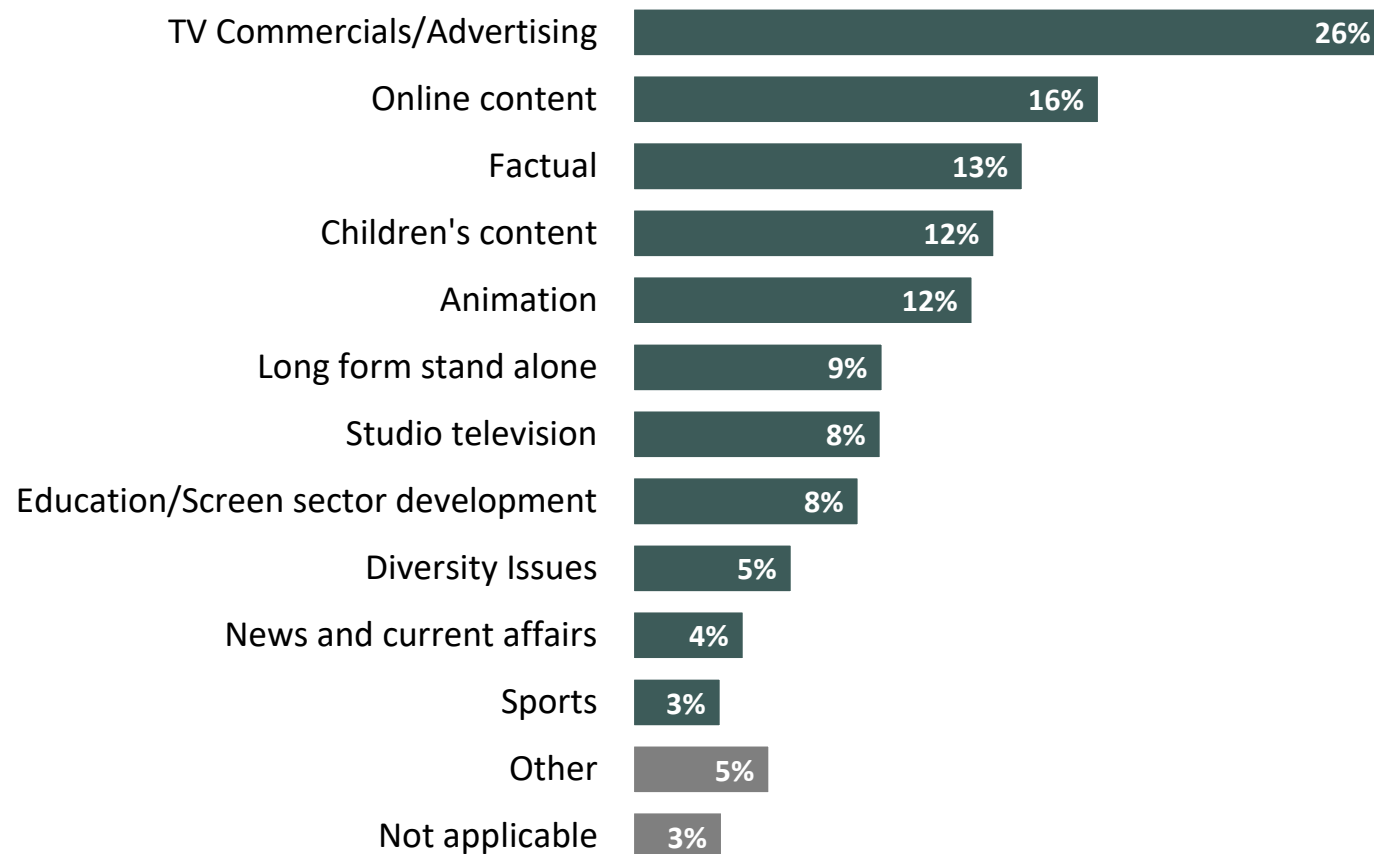

Previously, the NZFC initiated the screen survey with SARA (Screen Audience Research Australia), until Toi Mai took over the survey's management and analysis this year. The survey was conducted online with invitations to take part sent out by a number of guilds and organisations. As the NZFC had the main database of screen professionals, they were mainly responsible for promoting and distributing the survey across its members, with support from Toi Mai.

The total sample achieved was n=337 respondents. The margin of error (95% confidence level) is 5.34%. The fieldwork dates were from 11th of August to 23rd of September 2022.

- ▶ Most respondents (68%) have indicated they are currently in paid work. Around three quarters have work in the next week (73%) or month (77%).
- ▶ The majority of respondents who have done unpaid work in the sector have worked on or supported someone else's project (57%) or developed their own project (54%).
- ▶ Half of the respondents view unpaid work as important to the progression of their career. Some have cited it is a way to break into the industry, gain experience and build relationships across the sector.
- ▶ Almost six out of ten respondents (57%) have completed a Postgraduate diploma/degree or Bachelor's degree. Industry and NZFC-funded events and programmes were the popular trainings undertaken by the respondents.
- ▶ Only a few respondents deem having a qualification as very important or essential for entry to the screen sector (15%) and progression of their career (11%). Nearly three quarters of respondents (72%) feel there are gaps in their current skill base or knowledge.
- ▶ Mentoring schemes and short courses (1 to 5 days) have been identified as the favoured forms of professional learning that best suit the respondents' current situation with mixed delivery (part online and part face-to-face) as the most preferred mode of training delivery.

Survey results

Area or type of screen production where respondents predominantly work in

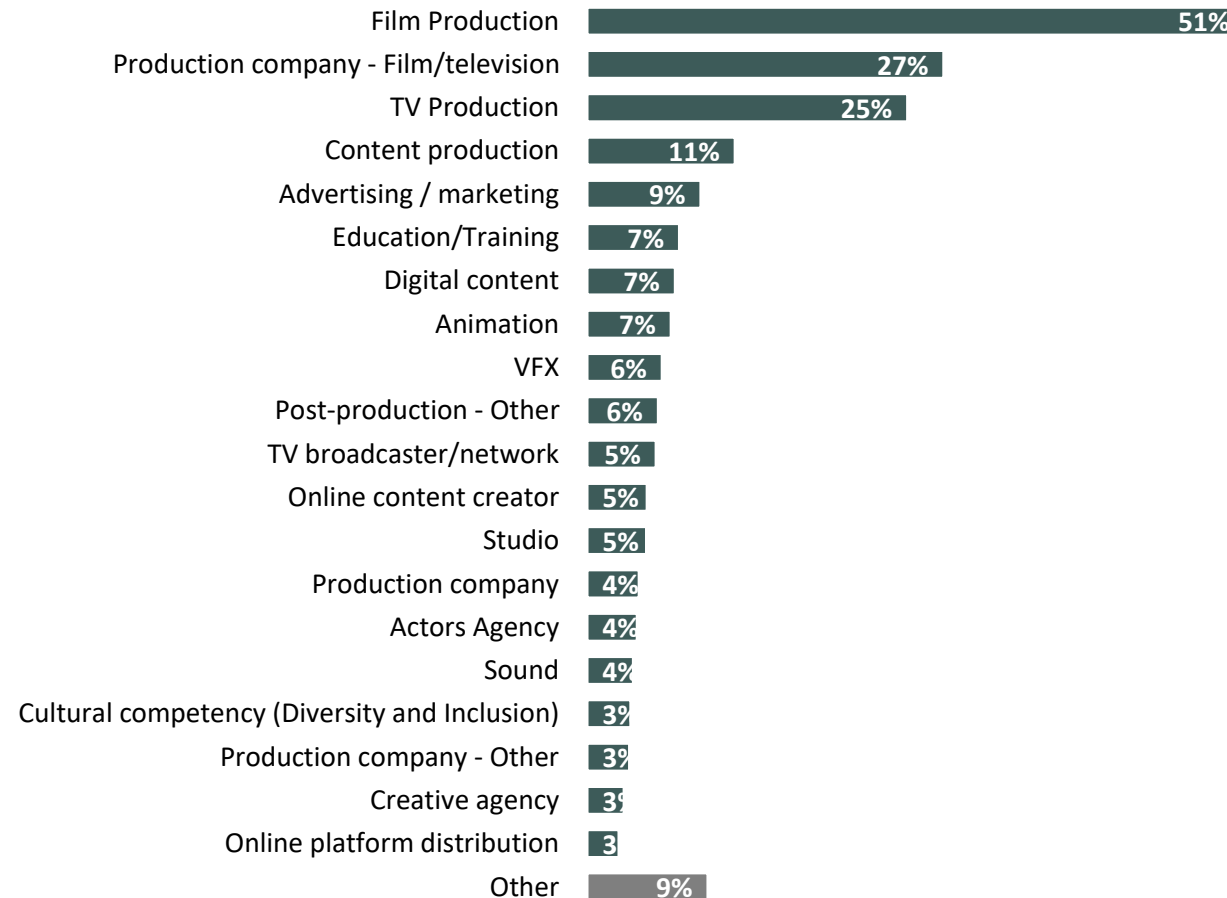

More than a quarter of the respondents work in TV Commercials/Advertising production. At least one in ten work in an area related to Online content, Factual production, Children’s content, and Animation.

Over half of female respondents work in feature film and at least a third work in the area of series drama and short form.

Note(s):
1. Q-Which of the following best describe the area or type of screen production you predominantly work in? Please select all that apply. Sample n=337; Areas of screen production <3% are not shown in the chart.

Creative business sector(s) respondents operate in

Film production, Film/Television, and TV production are the most common creative business sectors where respondents operate in.

There is no significant difference between the proportion of male (53%) and female (49%) respondents who operate in Film production.

In paid work

Key:

- Yes
- No
- Prefer not to say

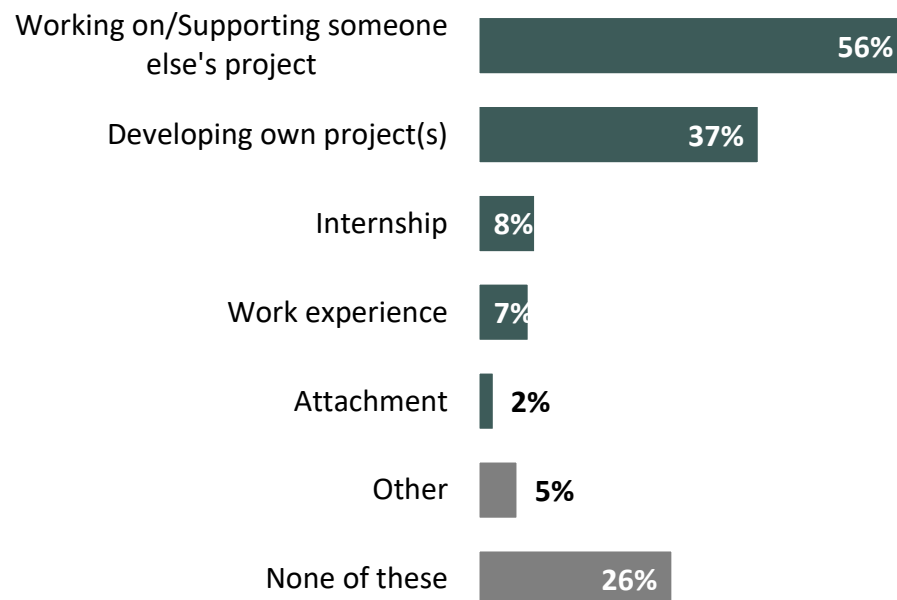

Most respondents (68%) are currently in paid work and around three in four have work in the next week (73%) or month (77%).

The proportion of female respondents who have indicated they have work in the next week is considerably bigger than that of male respondents (75% v. 65%).

Note(s):

1. Q-Are you currently in paid work? Please select one response only. Sample Yes n=216
2. Q-Do you have work in the next week? Please select one response only. Sample Yes n=223
3. Q-Do you have work in the next month? Please select one response only. Sample Yes n=202

Have done paid work

Have done unpaid work

Working on/supporting someone else’s project and developing one’s project are common among respondents who have done any paid or unpaid work in the last six years. The percentage of female respondents who have worked on someone else’s project without pay is relatively higher than that of male respondents (62% v. 55%). Most Māori respondents (70%) have done unpaid work on someone else’s project.

Note(s):

1. Q-Thinking about your screen work experience in the last 6 years, have you done any of the following work paid or unpaid? Please select all that apply. Sample n=337

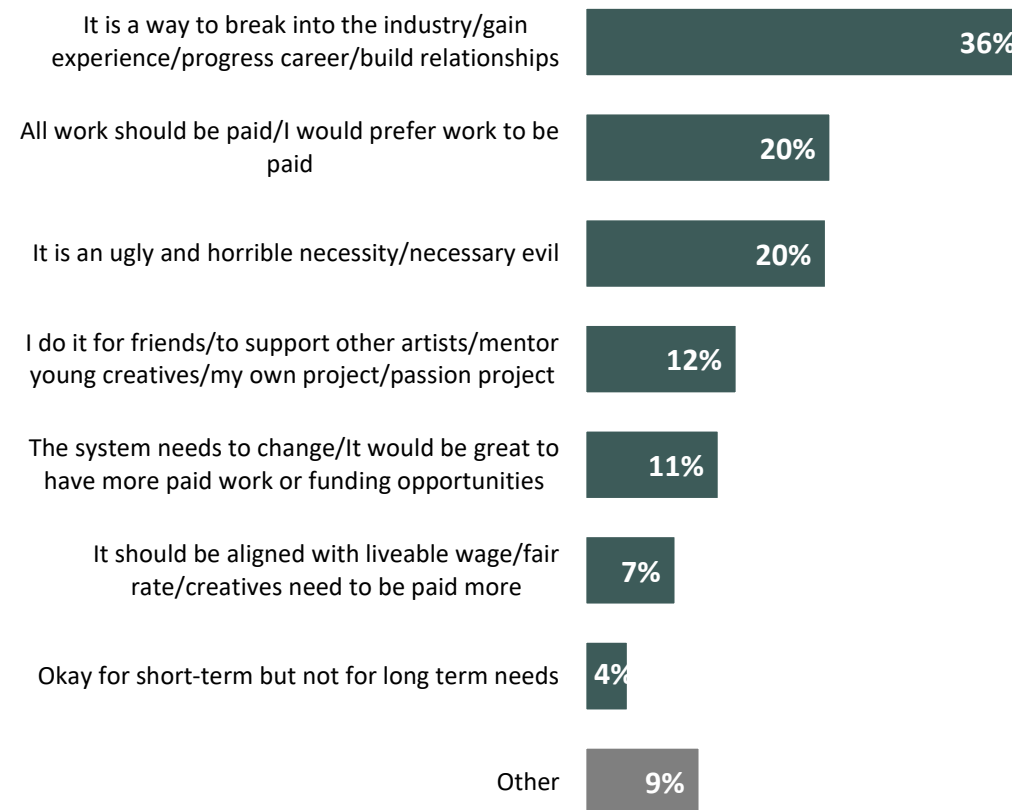

How important unpaid work has been to the progression of career

Nearly six in ten female respondents perceive unpaid work as very important or essential. Fewer than half of Māori respondents have the same perception.

Screen professionals view unpaid work as a way to break into the industry, gain experience and establish relationships. One in five prefer or think that all work should be paid.

Comments on unpaid work

Note(s):

1. Q-How important has doing unpaid work been to the progression of your career? Please select one response only. Sample n=245; Excluding 'Don't know'; Comments <3% are excluded
2. Q-Do you have any comments on unpaid work? Sample n=199

Self-classification of screen professionals

- Entry
- Emerging
- Established
- New
- Mid-Career

- Entry
- Emerging
- Established
- New
- Mid-Career

Around a quarter of crew respondents and writers/directors/producers consider themselves as emerging. The proportion of entry-level writers/directors/producers is relatively bigger than that of entry-level crews.

Note(s):

1. Q- Would you classify yourself as... Crew - sample n=176; Writer/Director/Producer sample n=161

Highest level of education completed

Relevant education or training undertaken

Two thirds of female respondents while about half of respondents from Māori and Pacific communities have completed a Bachelor's degree or Postgraduate diploma/degree.

Industry and NZFC-funded workshops or courses are the common training programmes undertaken relevant to the respondents' role in the industry.

Note(s):

1. Q-What is the highest level of education you have completed? Sample n=305
2. Q-Thinking specifically about the last six years, what education or training have you undertaken that was relevant to your current role in the industry/sector? Please select all that apply. Sample n=337

Importance of having a qualification

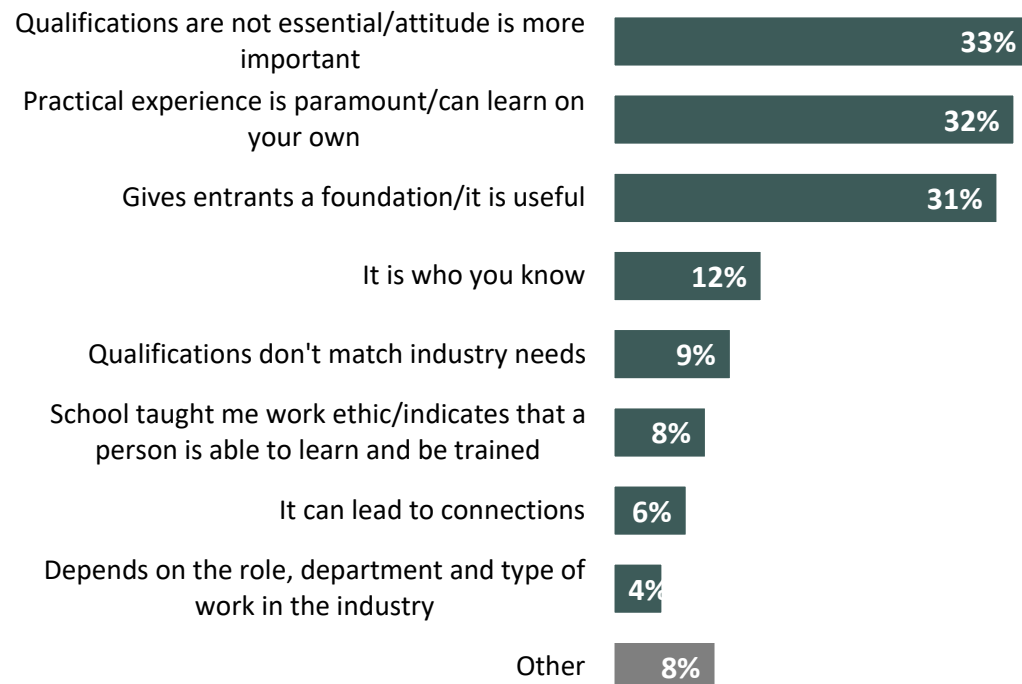

A few respondents perceive qualifications as very important or essential for entry to the screen sector or as a means to progress in one’s career. A quarter of them believe that having a qualification is not important at all in terms of career advancement.

Female respondents are less likely than male respondents to perceive having a qualification as very important or essential for entry to the screen sector. Only 2% of Māori respondents view having a qualification as very important or essential to progress one’s career.

Note(s):
1. Q-How important is having a qualification for the following: a) entry to the screen sector (Sample n=295); b) progress in your career in the sector (Sample n=293)?; * Caution: small sample size

Entry to the screen sector

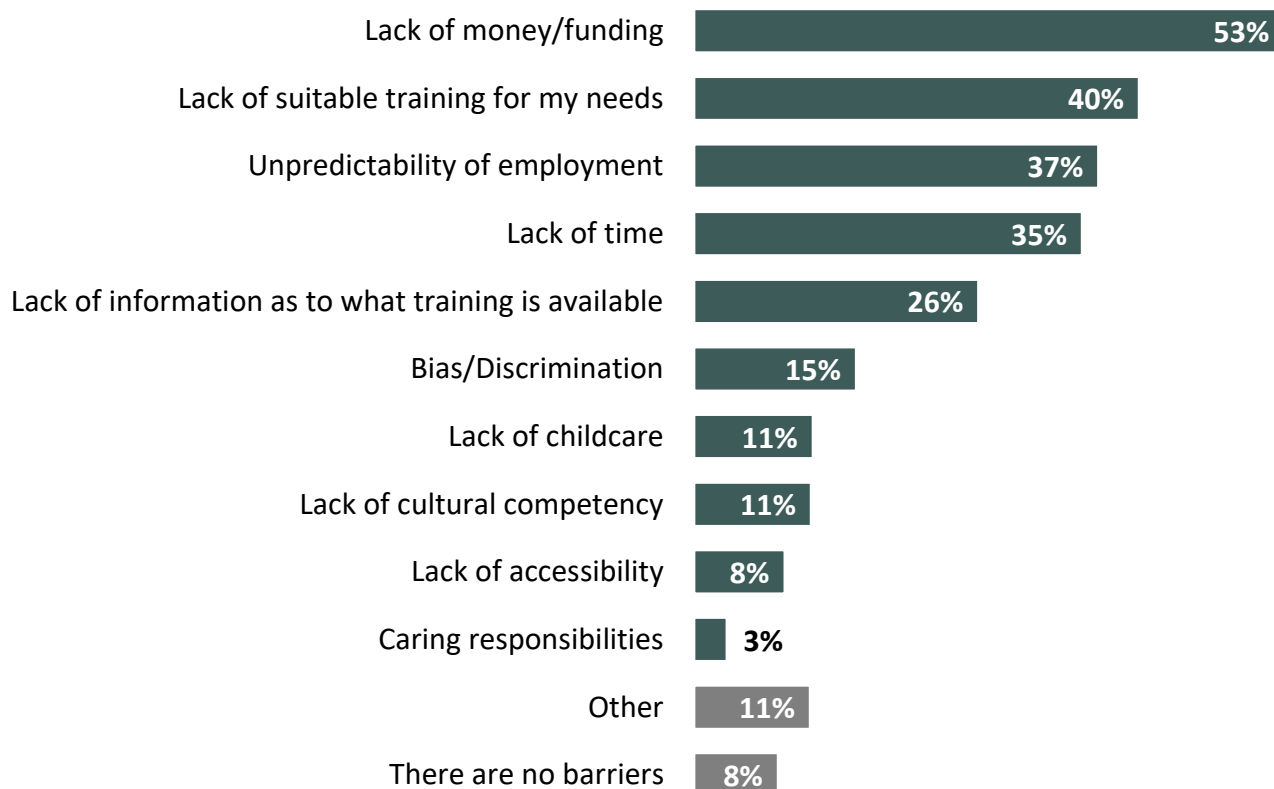

Progression of career

Respondents view qualifications as not essential when breaking into the screen sector. Some of them put more value on practical experience while the others think that qualifications give entrants a foundation regarding the knowledge and skills needed in the industry. When looking to progress in their careers, some respondents think that importance of having a qualification depends on the role, department and type of work in the industry.

Barriers to undertaking training

The main barriers to undertaking training relevant to the respondents’ goals in the sector relate to lack of money/funding, lack of suitable training, unpredictability of employment and lack of time. Only a few indicated that there are no barriers.

Female screen professionals are more likely than male screen artists to think that unpredictability of employment is a barrier to training.

Top barriers to training

- | Māori | Pacific peoples |
|--|---|
| <input type="radio"/> Lack of suitable training | <input type="radio"/> Lack of money/funding |
| <input type="radio"/> Lack of money/funding | <input type="radio"/> Lack of cultural competency |
| <input type="radio"/> Unpredictability of employment | <input type="radio"/> Lack of time |

Note(s):

1. Q-What (if any) barriers do you see to undertaking training relevant to your goals in the sector? Please select all that apply. Sample n=337

72% feel there are gaps in their current skill base or knowledge

Most respondents acknowledge gaps in their current skill base or knowledge (Male -74%, Female – 70%).

The most commonly considered priority areas of work requiring skills or knowledge development point to pitching skills, script writing, directing (scripted), and project financing.

Producers and writers are more likely than others to indicate skill gaps in terms of business skills. Film and TV performers mentioned skill gaps in pitching, script writing, directing, producing, and script/project development. Digital content people would like to improve their script/project development and assessment, directing (scripted), script writing, and pitching skills.

Top ten priority areas for skills or knowledge development

Note(s):

1. Q-Do you feel there are any gaps in your current skill base or knowledge that inhibit your career progression and/or creative output? Please select one response only? Sample: Yes n=204
2. Q-What would you consider to be the main area of work where you require skills or knowledge development? Sample n=337
3. Please see Annex A for more details on priority areas for skills or knowledge development by role.

Top ten other areas for skills or knowledge development

Business skills such as legal/contracting/deal making/rights negotiation, budgeting, management and employment, business planning and project financing were also identified as areas for skills or knowledge development.

Stage of career by demographics

	Male	Female	Māori	Pacific peoples*
Moving from shorts and/or entry level content creation to features or television series	33%	42%	34%	46%
Moving from a current role into a more senior position	22%	21%	20%	23%
Moving into a new area and/or genre	17%	13%	21%	10%
Other	28%	23%	24%	20%

More than a third of the respondents are moving from shorts and/or entry level content creation to features or television series and just under a quarter are moving from their current role into a more senior position. The proportion of female screen creatives who are moving from shorts and/or entry level content creation to features or television series is relatively higher than that of male screen professionals.

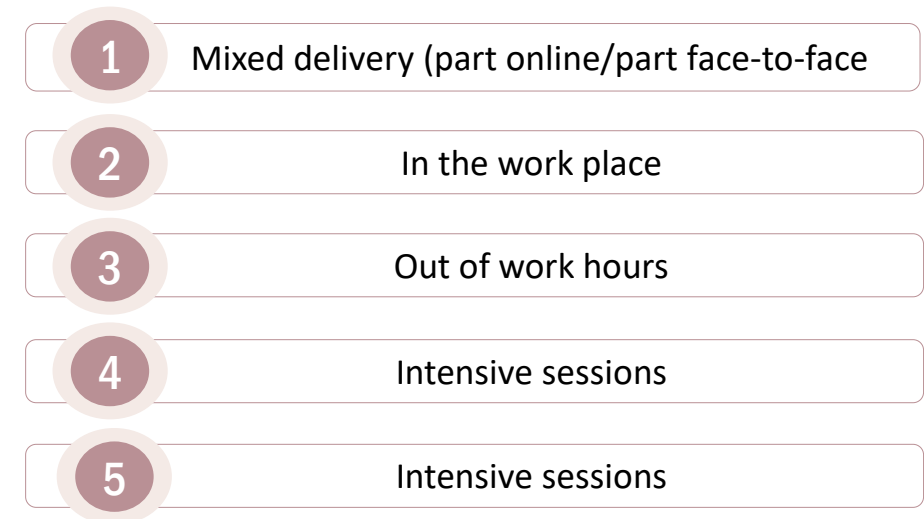

Note(s):

1. Q-Please indicate the stage of your career you are at and the career progression you are looking to make. Sample n=290; * Caution: small sample size

Form of professional learning

Top preferred modes of delivery

Mentoring schemes are the top option for female respondents while short courses with a duration of 1 to 5 days are the popular forms of professional learning among male respondents that best suit their current situation. Mixed delivery is the overall most preferred mode of delivery.

Note(s):

- Q-What form of professional learning do you feel best fits your current situation? Please select all that apply. Sample n=337
- Q-How should this education experience be delivered to be accessible for you? Please select all that apply. Sample n=337

Have attended a NZFC-funded event, training and/or talent development programme

Events most attended by respondents:

- Big Screen Symposium
- Script to Screen Talks
- Script to Screen Workshops
- Fresh Shorts
- SEED
- SPADA Conference
- Directing Actors
- Directing Toolkit
- Rehearsal and Performance Series
- Screensafe - Professional Respect Training
- Doc Edge Forum
- ScreenSafe / SWAG Professional Respect Training Workshop

Fewer than half of the respondents have attended a NZFC-funded event or training in the past six years. Some of these events were the Big Screen Symposium, Script to Screen Talks and Workshops and Fresh Shorts, among others.

Note(s):

1. Q-Have you attended a NZFC-funded event, training and/or talent development programme in the last six years? Please select one response only. Sample: Yes n=125, No n=133; Excluding 'Don't know'
2. Q-Please select the NZFC-funded events, training and/or talent development programmes you have attended. Please select all that apply. Sample n=57

How course attended helped in career progression

The chart above shows the ratings provided by the respondents for a few of the trainings that they attended[^]. Most respondents who attended the Script to Screen Workshops think that these events were useful to a great extent or very great extent in the progression of their career. On the other hand, 9% of respondents who attended the Script to Screen Talks find them useful to a great extent.

Note(s):

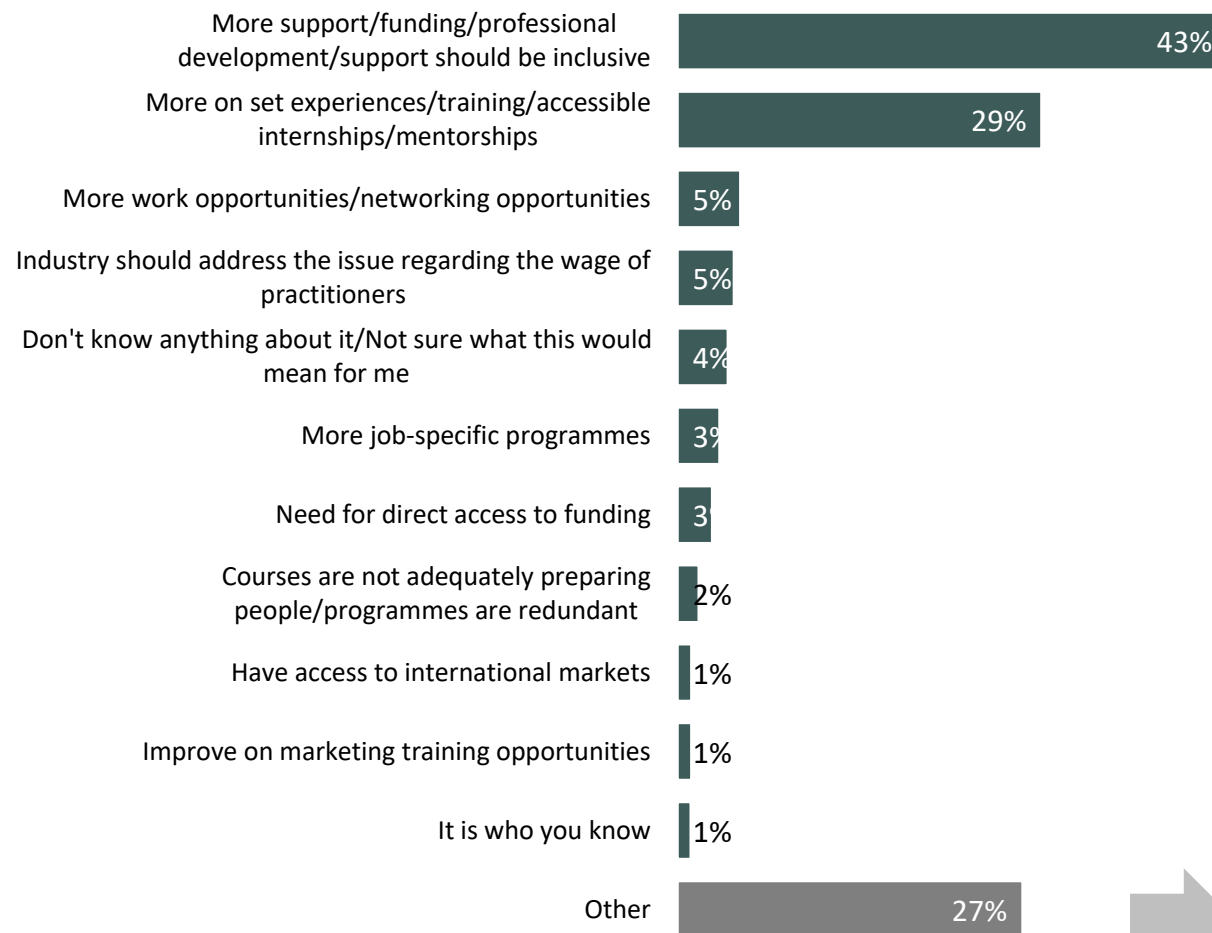

1. Q-Thinking about each of the courses you attended, how much has each course helped in your career progression? Please provide one response per course attended.
2. * Caution: small sample size
3. ^ Other training events attended are not shown due to small sample size

Most respondents agree or strongly agree with the statements about the screen industry with female screen professionals being more likely to agree to these statements than male screen workers.

Note(s):

1. Q-To what extent do you agree with the following statements? Please select one response per statement. Sample n=272; Excluding 'Don't know'

When asked how Toi Mai or NZFC can be more relevant to their skills development, some respondents suggested more support or funding, while others would like to have more on set experiences/training/accessible internships/mentorships.

“Other” includes:

- There is a shortage of skilled workers in Post Production so any development there would be great.
- More emphasis and respect placed on documentary filmmaking and separate funding and team for that.
- Creative coding is an emerging industry that doesn't feel represented by this survey.
- It seems lots of energy is moving this way lots being done with clear intentions of improving conditions, training and opportunities.
- The NZFC approach to Film Composer's publishing and mechanical rights needs looking at.
- I think it's worth exploring the idea of a small % of production funding going towards training. This is done in other countries and exploring if it would work in NZ.

Note(s):

1. Finally, do you have any further comments or suggestions on how Toi Mai Workforce Development Council or NZFC can be more relevant to you and your skills development needs? Sample n=126
